Education

- 2013 **B.S. Statistics and B.A. Political Science**, *Duke University*, Durham, NC.
Senior Thesis: *Wavelet-Based Functional Modeling of Accelerometer Data in Fitness Intervention Study*
Dean's List Fall 2011, Fall 2012, and Fall 2013

Technical Skills

- Languages: Python, JavaScript, TypeScript, Go, R, Java, \LaTeX
- Technologies: Flask, Django, React.js, Docker, MySQL, PostgreSQL, Elasticsearch, TensorFlow, MapReduce, Linux, aws, Nginx, git, Jira
- Skills: Machine Learning, NLP, Clustering, Ensembles, Dimensionality Reduction, Mixed-Effects Models, Decision Analysis, Bayesian Statistics, Nonparametric Methods, Data Visualization

Experience

- September 2017 - Current **Booz Allen Hamilton Software Developer**, Washington, DC.
- Designed backend search service for Grants.gov using Flask and Elasticsearch
 - Constructed containerized data pipeline for Grants.gov etl using Airflow
 - Created chatbot for award winning internal investment including both frontend design in React.js and backend architecture
- October 2015 - September 2017 **Morning Consult Data Scientist**, Washington, DC.
- Worked directly with company co-founders on all phases of polling projects including survey creation, monitoring, and data analysis (*Research has been cited by: **The Washington Post**, **New York Times**, **538**, **Fortune Magazine**, **The Hill**, **ABC**, **Huffington Post**, **Vox**, **Bloomberg**, among others*)
 - Wrote and maintained software packages for in-house modeling and data visualizations using Python and R
 - Developed data infrastructure and API integrations for automatic reporting using D3.js and Flask
 - Constructed and validated state and congressional-level election forecasts based on national surveys using multilevel regression and post-stratification (MRP)

October 2014 **Milwaukee Bucks Analytics Intern**, Milwaukee, WI.

- June 2015
 - Used the web application framework Shiny in the R programming environment to create a portal for distributing strategic information to coaches and front office employees
 - Constructed statistical models for tasks such as forecasting career outcomes for drafted players and predicting the efficiency of lineup combinations
 - Designed a framework for performance metrics to aid in player evaluation using several statistical methods
 - Worked directly under the Bucks' Director of Analytics along with front office employees and coaches to assist in evaluating the team's on-court performance
